Stoneware

Name.	Supplier	Firing	Comment
Nelson White	Potters Clay	1100-1300	A pure white earthenware to porcellaneous stoneware body. suitable for small or large thrown pieces. Very fine and smooth.

Price Options

20kg 1-5 bags:\$72.60 per bag

Stoneware	Southern Clays	1280-1300 deg C	Traditional Buff Stoneware. Produced for electric kiln firing. Light buff colour in oxidation. Good value
------------------	----------------	-----------------	--

Price Options

1-5 bags :\$25.50 per bag

6-24 bags:\$25.00 per bag

25-49 bags:\$24.50 per bag

50+ bags:\$24.00 per bag

Primo Clays - Production White	Primo	1140 - 1280C	Production White Stoneware PW10 has become the most popular general purpose white body. It functions well in the 1140-1280C range and is popular with production potters like Tony Sly. Decopot uses this body in their bisque production and Chris Weaver has found it exceptionally user-friendly. Shinkage at 1200C - 12% Vitreous at 1200C
---------------------------------------	-------	--------------	--

The Process

Selected raw materials are carefully weighed and blunged into a thin slip. This is passed through a 120 mesh vibrating screen and two rare-earth magnetic separators en route to a modern polypropylene filterpress.

Slip is dewatered in the filterpress to produce cakes of the required hardness in 1-tonne batches. The cakes are pugged through an efficient stainless steel de-airing pugmill. They are checked to ensure optimal hardness before being packed in 10Kg polythene bags.

Price Options

10Kg polythene-wrapped:\$24.90 per bag

Primo Clays - White Stoneware	Primo Clays	1160 - 1300C	White Stoneware An economical and very white stoneware body. Excellent throwing even for very large pieces. A favourite of Barry Doyle, Peter Smith and others. Duncan Shearer had good fired results from his wood firings and noted that it appeared immune to carbon trapping.
--------------------------------------	-------------	--------------	---

Mid Fire White	Potters Clay	1154-1220 Cone 7-10	Has the best qualities of Nelson White but lower maturing temperature.
-----------------------	--------------	------------------------	--

Price Options

20kg 1-5 bags:\$72.60 per bag

Porcelain

Name.	Supplier	Firing	Comment
Primo Clays - Mid-fire Porcelain	Primo Clays	1140 -	Mid-fire Porcelain
		1240C	This supremely white body is a dream to throw and trim. It is translucent at 1200C. This is the body of choice of Peter Collis who uses it to produce a range of thrown and built pieces up to 1 metre high. The body enables Peter to achieve a wide range of dramatic glaze effects with consistency. Shinkage at 1200C - 12% Vitreous at 1200C

The Process

Selected raw materials are carefully weighed and blunged into a thin slip. This is passed through a 120 mesh vibrating screen and two rare-earth magnetic separators en route to a modern polypropylene filterpress.

Slip is dewatered in the filterpress to produce cakes of the required hardness in 1-tonne batches. The cakes are pugged through an efficient stainless steel de-airing pugmill. They are checked to ensure optimal hardness before being packed in 10Kg polythene bags.

Price Options

10Kg polythene-wrapped:\$36.50 per bag

Primo Clays - High-fire Porcelain	Primo Clays	1160 - 1300C	High-fire Porcelain Even whiter than the mid-fire porcelain this body also has exceptional throwing properties. It is highly rated by Anneke Borren, Raewyn Atkinson and Neil Grant. It begins to show translucent qualities above 1200C and is still stable at 1300C. Shrinkage at 1200C - 12% Vitreous at 1260C

White Grog Raku Clay	Blackwattle	up to stoneware temperature	A white clay with large addition of fine white grog(35%)(0.5mm). Suitable for large pots, sculptural work,tiles etc. Handbuilt or thrown. An extremely strong clay. May be fired to stoneware temperatures. Grog Size-30 Suitable for raku firing . Shrinkage Wet-1100oC 5% Wet-1280oC 9%

Price Options

10kg:\$34.45 per bag

Southern Ice	Feenys	1280-1305 Deg C	'Southern Ice' is an exciting porcelain body. Quite large pieces can be made due to its excellent throwing properties. It offers a uniquely cool and brilliant whiteness that responds extremely well to the application of air-brushed underglaze pigments, then high-fired in an electric kiln. Various degrees of translucency can be achieved by sponging back when bone dry through successive layers of painted resists. 1280-1305 deg.C

BRT	Feeney Clays	1100-1260 Cone 03-8	Based on Stoneware clays with large amounts of refractory grog and crushed trachyte. Hand building and sculptural. May be fired up to low stoneware. Very highly speckled and dark in colour, and very vitreous.
------------	--------------	---------------------	--

Price Options

12.5kg:\$36.45 per bag

Buff Terracotta Paper Clay	Blackwattle	1000-1150m deg.C	Good all round clay. Good for Wheelwork and handbuilding. Good plasticity, with enough fine grog (0.5mm) for slabwork etc. Fires to a buff terracotta depending on temperature and atmosphere. Bisque 1050 deg.C, Glaze 1000-1150 deg.C. The addition of cellulose fibre gives the clay extreme plasticity and dry strength. Can be used as an air drying clay, or fired to normal earthenware temperatures. Underglazes and glazes should be applied after bisque.
-----------------------------------	-------------	------------------	--

Price Options

10kg:\$34.00 per bag

White Earthenware Clay	Blackwattle	1080-1150 deg.C	Very plastic white firing Earthenware. Good for throwing and handbuilding. Desirable clay where plasticity is required. Bisque 1050 deg.C. Glaze 1080-1150 deg.C. (4% shrinkage) Good glaze fit. Compatible with various clear glazes.
